DETAILED ACTION

Response to Communication(s)

1. This Office Action is in response to the communication(s) filed on August 31st, 2007.

Claims 1-50 are now pending in the application.

Terminal Disclaimer

2. The terminal disclaimer filed on August 31st, 2007 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. 6,658,016 issued December 2, 2003, has been reviewed and is accepted. The terminal disclaimer has been recorded.

EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Attorney Brad Y Chin (Reg# 52,738) on November 11, 2007.

The application has been amended as follows:

IN THE CLAIM:

The following change to the claim 35 has been approved by the examiner and agreed upon by applicant:

In the claim 35, line 4, “i13” has been changed to -- in --.

Allowable Subject Matter

4. Claims 1-50 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

Many references in the art disclose the packet switching fabric. Most of those references are comprising a plurality of switching devices coupled together by data ring and control ring for managing data transfer via buffer units and control by processor, such as that found in Davis et al. [5,883,895], Wong et al [U.S. 6,363,077], Dai et al [U.S. 6,246,692]. But no prior art reference discloses the source manager and means for developing pointer information and providing transfer announcement; the destination manager and means for arbitrating between local and remote requests for access to network ports and generating transfer notification information for transfer data packets, and where the processor communicates control messages to switching devices through control ring based on transfer announcement.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
